RE: Notification of the Replacement Date for the S10 and S20 COMs

Dear Mr. Matty:

Manitowoc Public Utilities is scheduling the replacement of the existing COMs installed in stacks S10 and S20 with new Durag Model D-R 290 COMs for August 5 through the August 8. The new COMs will be provided, installed, and certified by the system integrator Control Analytics, Inc.

The new COMS will be installed in the same location as the existing units and will continue to use the existing DAHS. The units will be installed consecutively; however during construction no COM will be operational during each replacement. We propose to collect visible emission data for 18-minutes once each day until the new COM is operational with associates with valid visible emission certifications to collect the emission data. We will provide you notification of the actual shutdown and start-up dates.

If you have any questions regarding this notification or need additional information please don't hesitate to contact me.

Sincerely,

Thomas E. Reed, P.E.
Environmental Engineer
Manitowoc Public Utilities
